High Precision Universal Oil Country Lathe Machine with Large Spindle Bore and Double Lathe Chucks For Long Tube Pipe Threading

This kind of MM-TubeTurn280S is High Precision Conventional Pipe Threading Lathe with Two Chucks which is been made in ISO9001 factory from MAXNOVO MACHINE with CE Safety Certification. The high precision Oil Country Lathe Machine is a special machine for machining long metal work-pieces such as segments of drill strings. This universal Oil Country Lathes are designed for turning pipes and pipe fittings for oil and gas fielding and metal industry. It could be big bore lathe of double chucks mounted at both sides of headstock, or it could have large swing for big work-pieces. It could be applied to oil pipes, big steel rollers, large diameter flanges, long shafts of ships and etc. Besides, for better work-piece clamping. Such Pipe Threading Lathe mainly used for turning internal and external threads include metric and inch thread, as well as process many universal functions.
